SUMMARY

React Native | React.Js | Flutter Flow

Frontend-focused **Mobile & Web** Developer with **3 years** building production-grade cross-platform applications across **healthcare, fintech**, and SaaS verticals. Shipped 5+ apps from Figma to App Store using **React Native** and **FlutterFlow**. Currently expanding into **AI workflow automation (n8n, Claude API)** and low-code platforms – bridging the gap between rapid deployment and custom engineering. Background in Mechanical Engineering sharpened a bias toward performance optimization and systems thinking that carries directly into code.

PROFESSIONAL EXPERIENCE

TEGAIN PRIVATE LIMITED

REACT NATIVE | FLUTTERFLOW - 01 MAY 2024 - PRESENT

- 1.Developed and deployed 5+ cross-platform mobile applications using **React Native** and **FlutterFlow**
 - 2.Reduced app launch times by 30% by refactoring state management architecture and implementing **code splitting** and **lazy loading** across two high-traffic healthcare applications
 - 3.Cut team **merge conflicts** by 60% by designing and enforcing a **GitLab** branching strategy adopted across a 6-person engineering team
 - 4.Integrated **LiveKit** and **Agora** Video **SDKs** to deliver real-time doctor-patient teleconsultation features – zero critical post-launch video streaming bugs reported across 3 months of production
 - 5.Implemented **Razorpay payment gateway** and **Crisp** live chat SDK, reducing third-party integration delivery time by standardising a reusable API wrapper pattern used across subsequent projects
 - 6.Facilitated effective communication and coordination between technical and quality assurance teams through regular **Microsoft Teams** meetings, ensuring alignment on project requirements and streamlined issue resolution
 - 7.Collaborated with cross-functional teams including designers, QA engineers, and product managers to deliver projects on time with 98% requirement compliance using **Agile methodologies** with **Taiga** and **Jira**
 - 8.Converted 100% of assigned **Figma** screens to pixel-perfect mobile UI with zero design review rejections on final QA pass
-

STEYP PRIVATE LIMITED

FULL STACK DEVELOPER (Internship) - 01 MAY 2023 - MAY 2024

- 1.Improved database query performance by 25% on a **Django**-backed web platform by redesigning schema indexing and eliminating N+1 query patterns
 - 2.Designed and developed responsive **frontend** interfaces using **HTML5, CSS3, JavaScript**, and **Bootstrap**, ensuring cross-browser compatibility.
 - 3.Implemented **backend REST APIs** with Django framework, including user **authentication**, database operations, and third-party service integrations.
 - 4.Developed a **React Native** mobile companion app as an extension of an existing web platform, reducing feature parity gap between web and mobile from 60% to 90% within one quarter
 - 5.Owned full **API** integration **lifecycle** – **authentication**, CRUD operations, and third-party service connections – across 4 production web projects
-

TECHNICAL SKILLS

Mobile Development

- React Native , FlutterFlow , Cross-platform Development , Mobile UI/UX

Frontend Technologies

- JavaScript (ES6+ , React.js , HTML5 , CSS3 , Bootstrap , Responsive Web , RESTful APIs

Development Tools:

- Git & GitLab , Visual Studio Code , Android Studio , Xcode , Cursor , Antigravity

Project Management:

- Jira , Taiga , Agile Methodologies , Scrum , Slack , Microsoft Teams

Testing & Deployment:

- Unit Testing , App Store Deployment , Performance Optimization

3rd Party Integration & Backend Technologies

- Agora SDK (Video call) , Live-kit SDK (Video call) , Crips (Online chat) , Razor-Pay , Python , Django Framework , Database Integration

EXPANDING EXPERTISE · SELF-INITIATED

Currently building hands-on proficiency outside of employment in three high-demand areas:

AI Workflow Automation — n8n

- Built multi-step automated workflows connecting APIs, **webhooks**, and third-party services without writing backend infrastructure from scratch
- Connected n8n workflows to external **REST APIs** and database endpoints, replicating backend logic that would otherwise require a dedicated developer sprint
- Self-hosted and managed n8n instances, gaining practical understanding of workflow versioning, **error handling**, and execution logs in production-like environments

Vibe Coding — AI-Assisted Development

- Actively practice **vibe coding** methodology — using **AI** to scaffold components, debug logic, and accelerate feature delivery rather than writing boilerplate from scratch
- Reduced personal development time on repetitive UI patterns by generating base code through AI **prompts**, then refining and integrating into production-quality **React Native** and **React.js** codebases
- Use AI-generated code critically — reviewing, testing, and adapting outputs rather than blindly shipping, maintaining code quality and performance standards throughout

Claude API Integration — Anthropic (OpenClaw)

- Integrated **Claude API** into personal projects to power intelligent features including context-aware chat interfaces, document summarisation flows, and dynamic content generation
- Combined Claude API with **n8n** to create fully automated AI-driven workflows — where user input triggers an n8n pipeline, calls Claude for processing, and returns a structured output to the frontend with zero manual intervention

Low-Code Platform Development — WixStudio & Shopify

- Delivered web projects on WixStudio using **Velo (JavaScript API)**, custom **datasets**, dynamic pages, and third-party widget integrations — going well beyond standard drag-and-drop.
 - Built and configured Shopify storefronts including theme **customisation** using Liquid **templating**, app integrations, product logic, checkout flow **optimisation**, and performance
 - Ability to independently scope, build, and launch a complete digital product — web presence, **e-commerce**, or **landing page** — without backend dependencies or design handoffs.
-

Education

Bachelor of Engineering in Mechanical Engineering

Dhanalakshmi srinivasan college of engineering coimbatore

2017 - 2021

CERTIFICATIONS & TRAINING

React Native Development | Full Stack Web Development | Agile Project Management | Git Ve

LANGUAGES

English | Malayalam | Hindi — Full professional proficiency (Read, Write, Speak)
